CATHEDRAL of ULM, West Germany, showing world's highest church tower (528 ft.). This model was made by the wood-carving artist, Johann Schneider, who began his career at the age of eight. Constructed entirely by hand, this work was completed in 2 yrs. and 10 months, and contains 4267 separate pieces. It has been valued at $115,000 by a prominent architect, and is a fine example of his collection of over 3000 different pieces.
